Alphabetical Tag Cloud – Overview

Alphabetical Tag Cloud · https://publishpress.com/knowledge-base/alphabetical-tag-cloud-overview/

The Alphabetical Tag Cloud feature allows you to show terms in a layout where they are automatically organized by their first letter. Your terms are sorted under tabs. Each tab displays the first letters that were found in the tags. You can use either shortcodes or Gutenberg blocks for this feature.

Here's a screenshot of the Alphabetical Tag Cloud feature from our demo site.
