Alphabetical Tag Index – Overview

Alphabetical Tag Index · https://publishpress.com/knowledge-base/alphabetical-tag-index/

The Alphabetical Tag Index feature is part of the Tag Groups plugin. This feature allows you to show terms in a layout where they are automatically organized by their first letter. You can use either shortcodes or Gutenberg blocks.

Here's a screenshot of the Alphabetical Tag Index feature from our demo site. We're using a custom Unicode icon and a three column layout.
