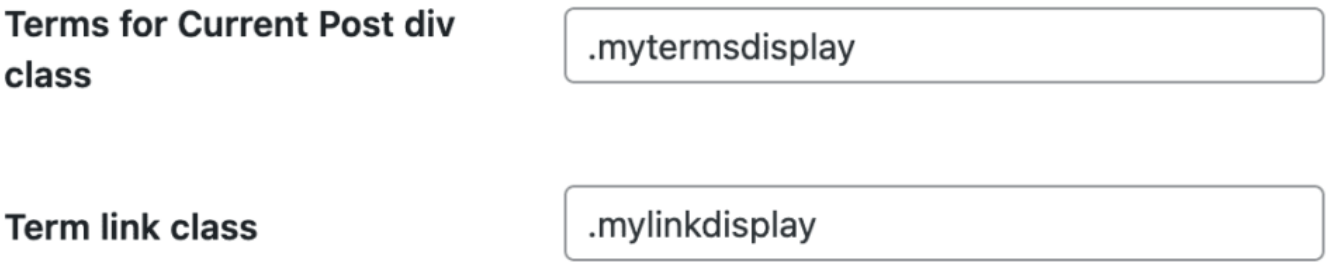
Add CSS to Terms for Current Post

Taxonomies: Current Post · https://publishpress.com/knowledge-base/css-terms-for-current-post/

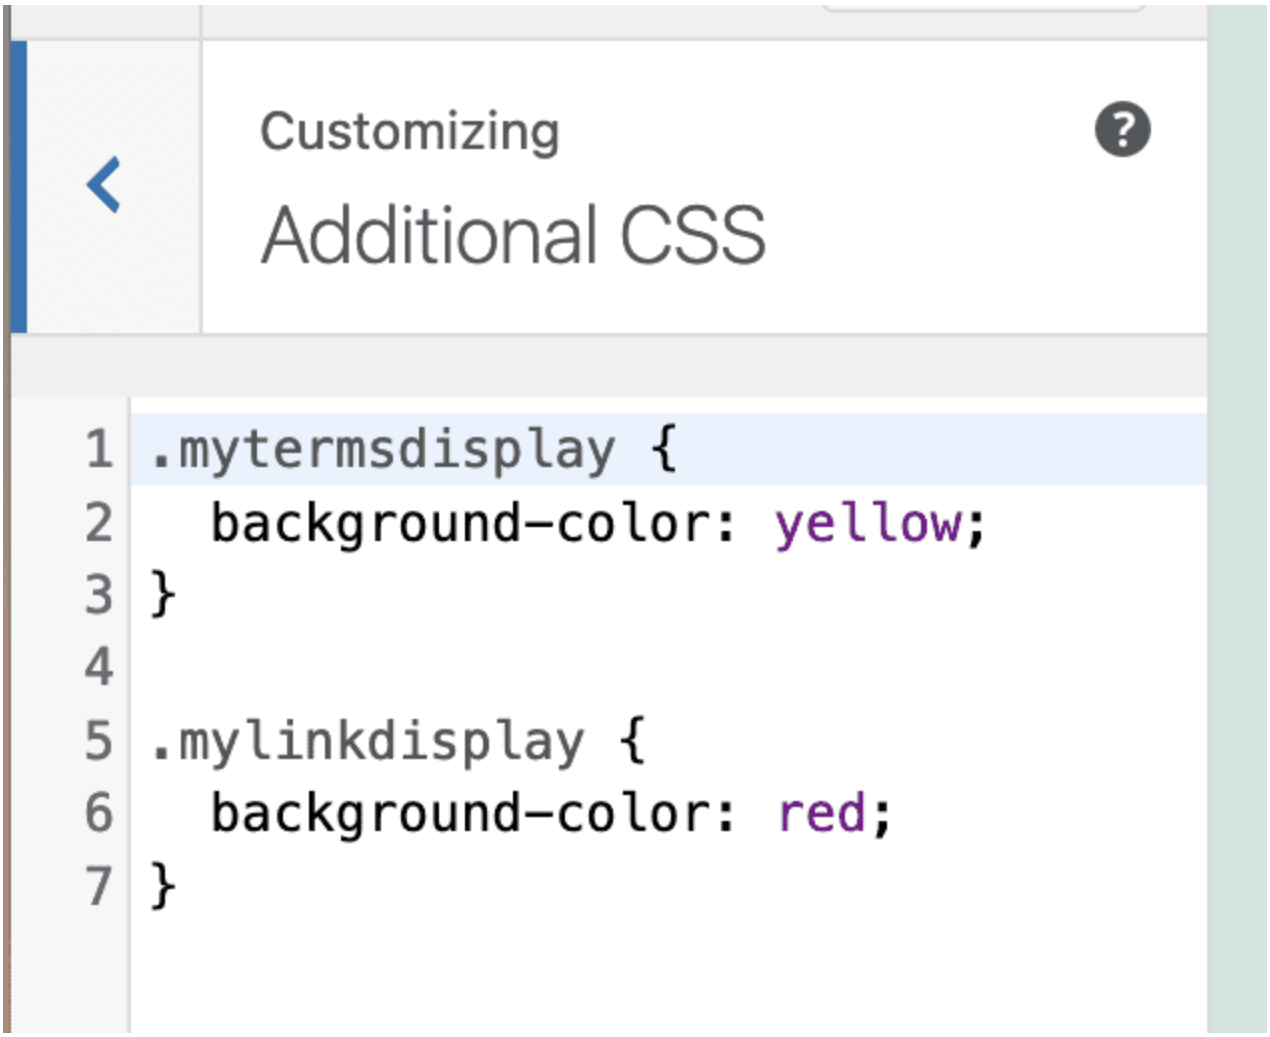
In Taxonomies you can change the format of your Terms for Current Post display. You can also add your CSS to the display of terms.

Go to Taxonomies > Current Post > Advanced and you can add your CSS to the whole div or to specific links. You can do this using the settings below:

Here is an example of adding classes to these two fields:



I can then add the CSS for those classes to my theme, or to the "Customize" feature of WordPress.



Customizing
Additional CSS
1 .mytermsdisplay {
2 background-color: yellow;
3 }
4
5 .mylinkdisplay {
6 background-color: red;
7 }
