Beaver Builder Capabilities

WordPress Plugins · https://publishpress.com/knowledge-base/beaver-builder-capabilities/

The Beaver Builder plugin is a flexible drag and drop page builder that works on the front end of your WordPress website. Whether you're a beginner or a professional, you're going to love taking control of your website. Stop writing HTML or wrestling with confusing shortcodes. With Beaver Builder, building beautiful, professional WordPress pages is as easy as dragging-and-dropping.

About Beaver Builder Capabilities

The Beaver Builder plugin use a core WordPress capability to control user access:

- edit_posts

It will also be very helpful for users to have this other core WordPress capability. The Beaver Builder documentation explains the importance of this capability.

- unfiltered_html

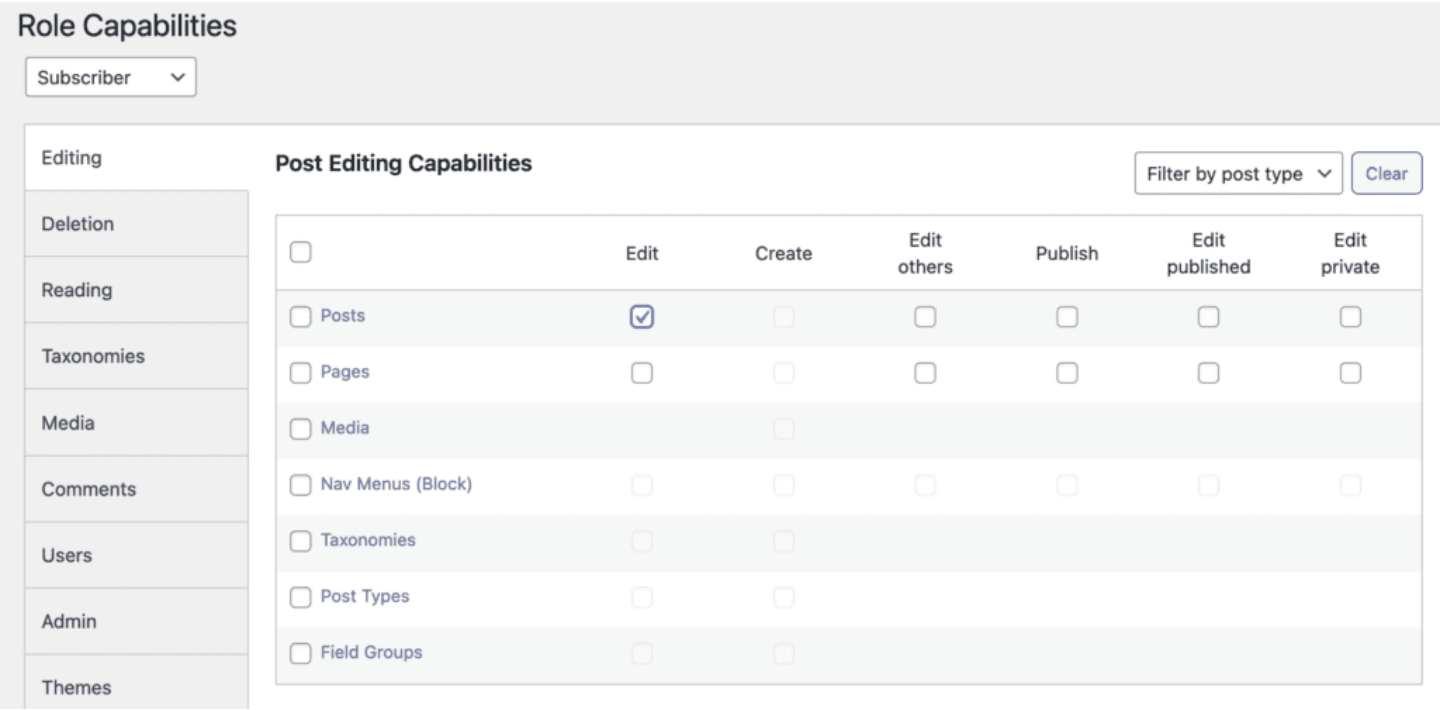

If you want to give users access the Beaver Builder settings, you will need to give users this core WordPress capability:

- manage_options

How to Give Beaver Builder Capabilities to User Roles

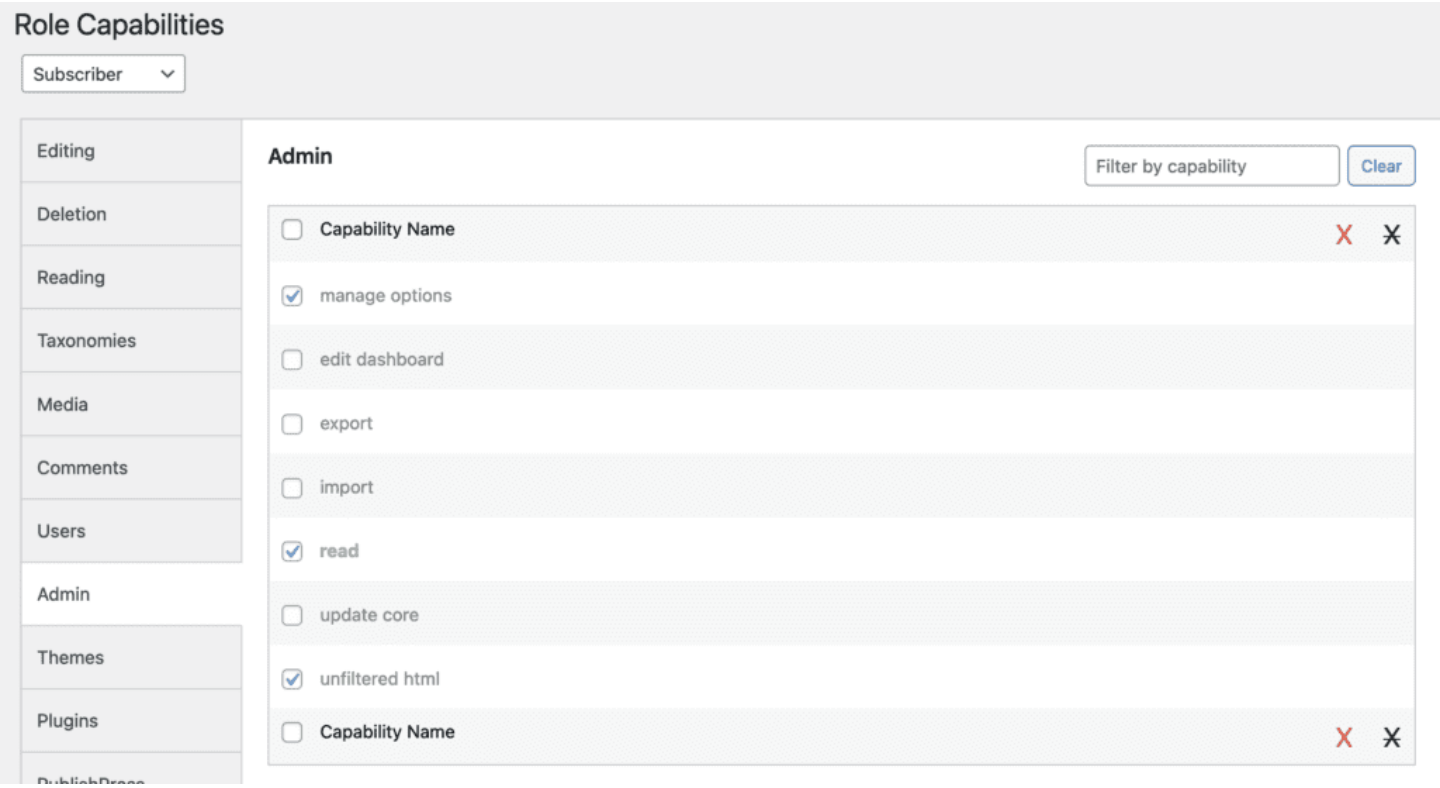

If you use the PublishPress Capabilities plugin, you can choose which user roles have the edit_posts capability.

- Go to the "Capabilities" screen and click the "Editing" tab. You will be able to grant this capability to a new user role.

You can also use the PublishPress Capabilities plugin, go grant access to the unfiltered_html and manage_options capabilities.

- Go to the "Capabilities" screen and click the "Admin" tab. You will be able to grant these capabilities to a new user role.
