Membership: Date Limits for Group Members (Pro)

Membership · https://publishpress.com/knowledge-base/groups-date-limits/

This feature requires the Pro version of the PublishPress Permissions plugin.

This feature of PublishPress Permissions. allows you to set date limit on Permission Group membership.

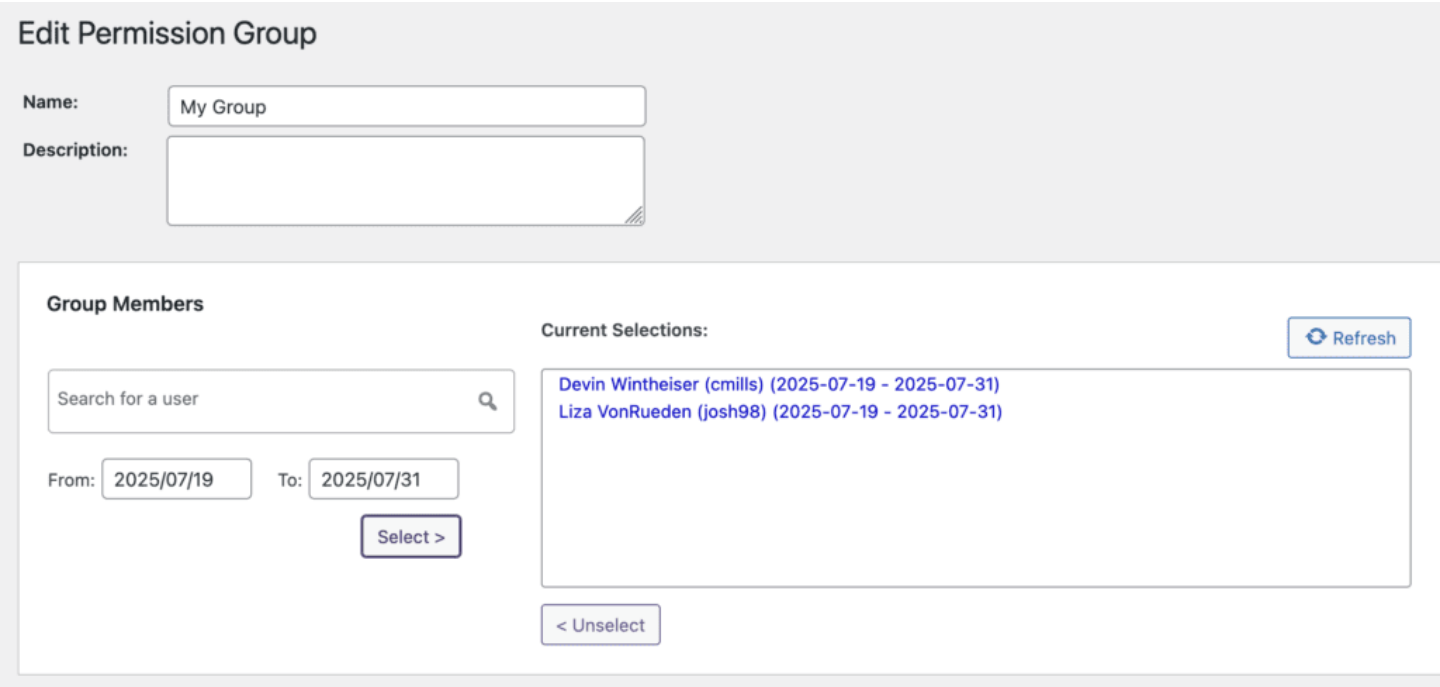
This only applies to custom user groups.

By default, PublishPress Permissions also creates groups for the WordPress user roles (Subscriber, Contributor, Author, Editor) but membership in those groups can not be time limited.

- Go to Permissions > Settings > Features.
- Check the box for "Membership".
- Click "Save Changes".

Now you can use this feature:

- Go to Permissions > Groups.
- Click "Add New".
- In the "Group Members" area you can search for members to add to your site.
- In the bottom of the "Group Members" area, you can choose a "From" and "To" date for the group membership.



Edit Permission Group
