Can I Use Tag Groups Multiple Times on The Same Page?

Yes, this is possible with these displays:

- Tabbed Tag Cloud
- Accordion Tag Cloud
- Table Tag Cloud
- Simple Tag Cloud
- Alphabetical Tag Cloud
- Tag List
- Alphabetical Tag Index
- Shuffle Box

More than one tag cloud of these types on the same page is possible. You simply enter the same shortcode again, or the same Gutenberg block again.

You only have to make sure that the parameter div_id (or table_id) is different for every cloud. If you don't use that parameter, it will be set automatically and you don't need to worry about that.

Exceptions That Can Only Be Used Once

The Toggle Post Filter and Dynamic Post Filter can only be used once per page and not together.
