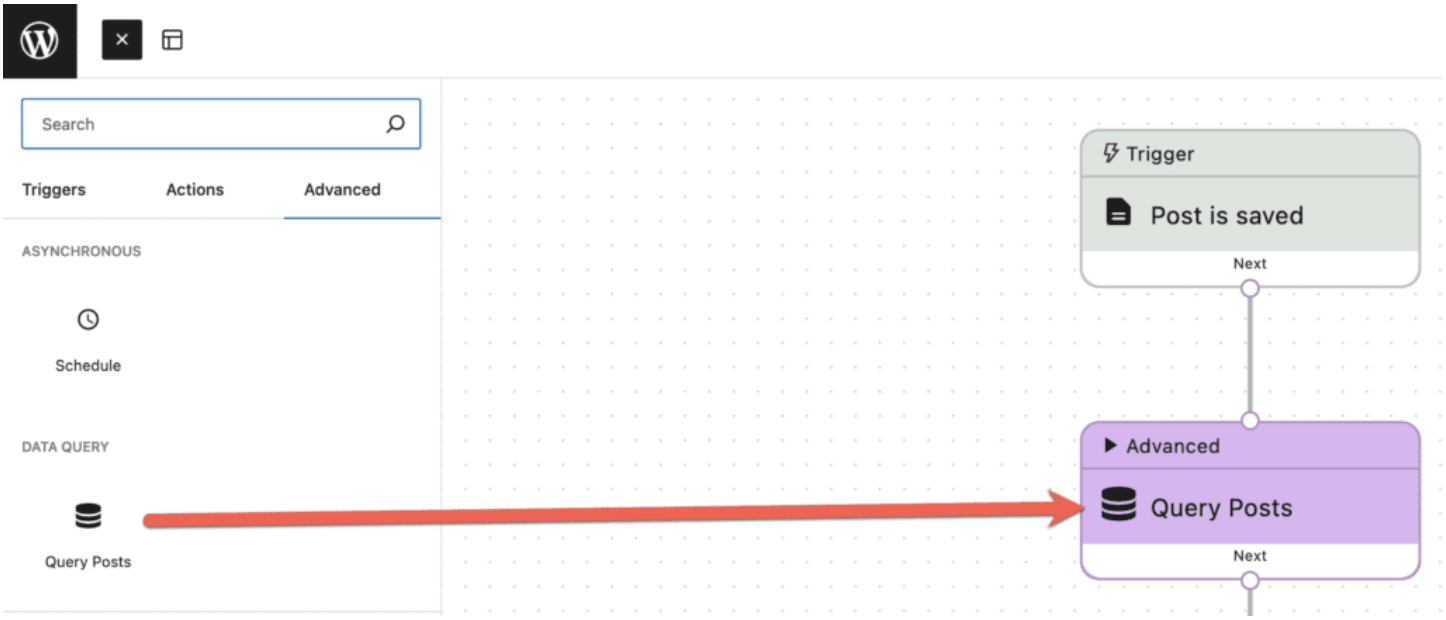
Query Posts (Pro)

Action Workflows: Actions · https://publishpress.com/knowledge-base/query-posts-step/

This feature requires the Pro version of the PublishPress Future plugin.

"Query Posts" is one of the steps available in the "Action Workflows" feature of the PublishPress Future Pro plugin. This step retrieves multiple posts to serve as the input for other steps. You can add a "Query Posts" step from the "Advanced" tab of the "Action Workflows" area.



The settings for the Query Posts step are available in the right sidebar:

- **Post Type**
- **Post ID**
- **Post Status**
