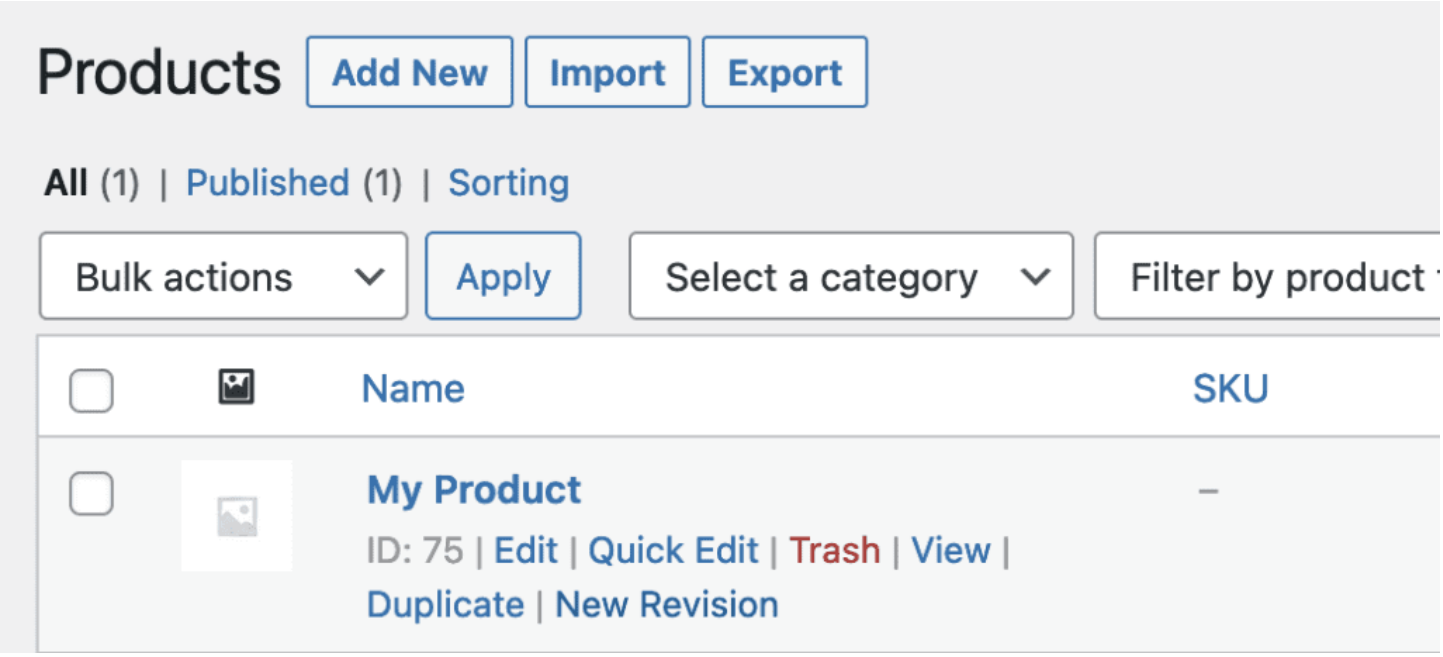
PublishPress Revisions Support for WooCommerce (Pro)

New Revisions Integrations · https://publishpress.com/knowledge-base/revisions-woocommerce/

This feature requires the Pro version of the PublishPress Revisions plugin.

WooCommerce is the most popular way to build a WordPress eCommerce site. With the Pro version of PublishPress Revisions you can submit, moderate, approve and schedule revisions to your WooCommerce products.

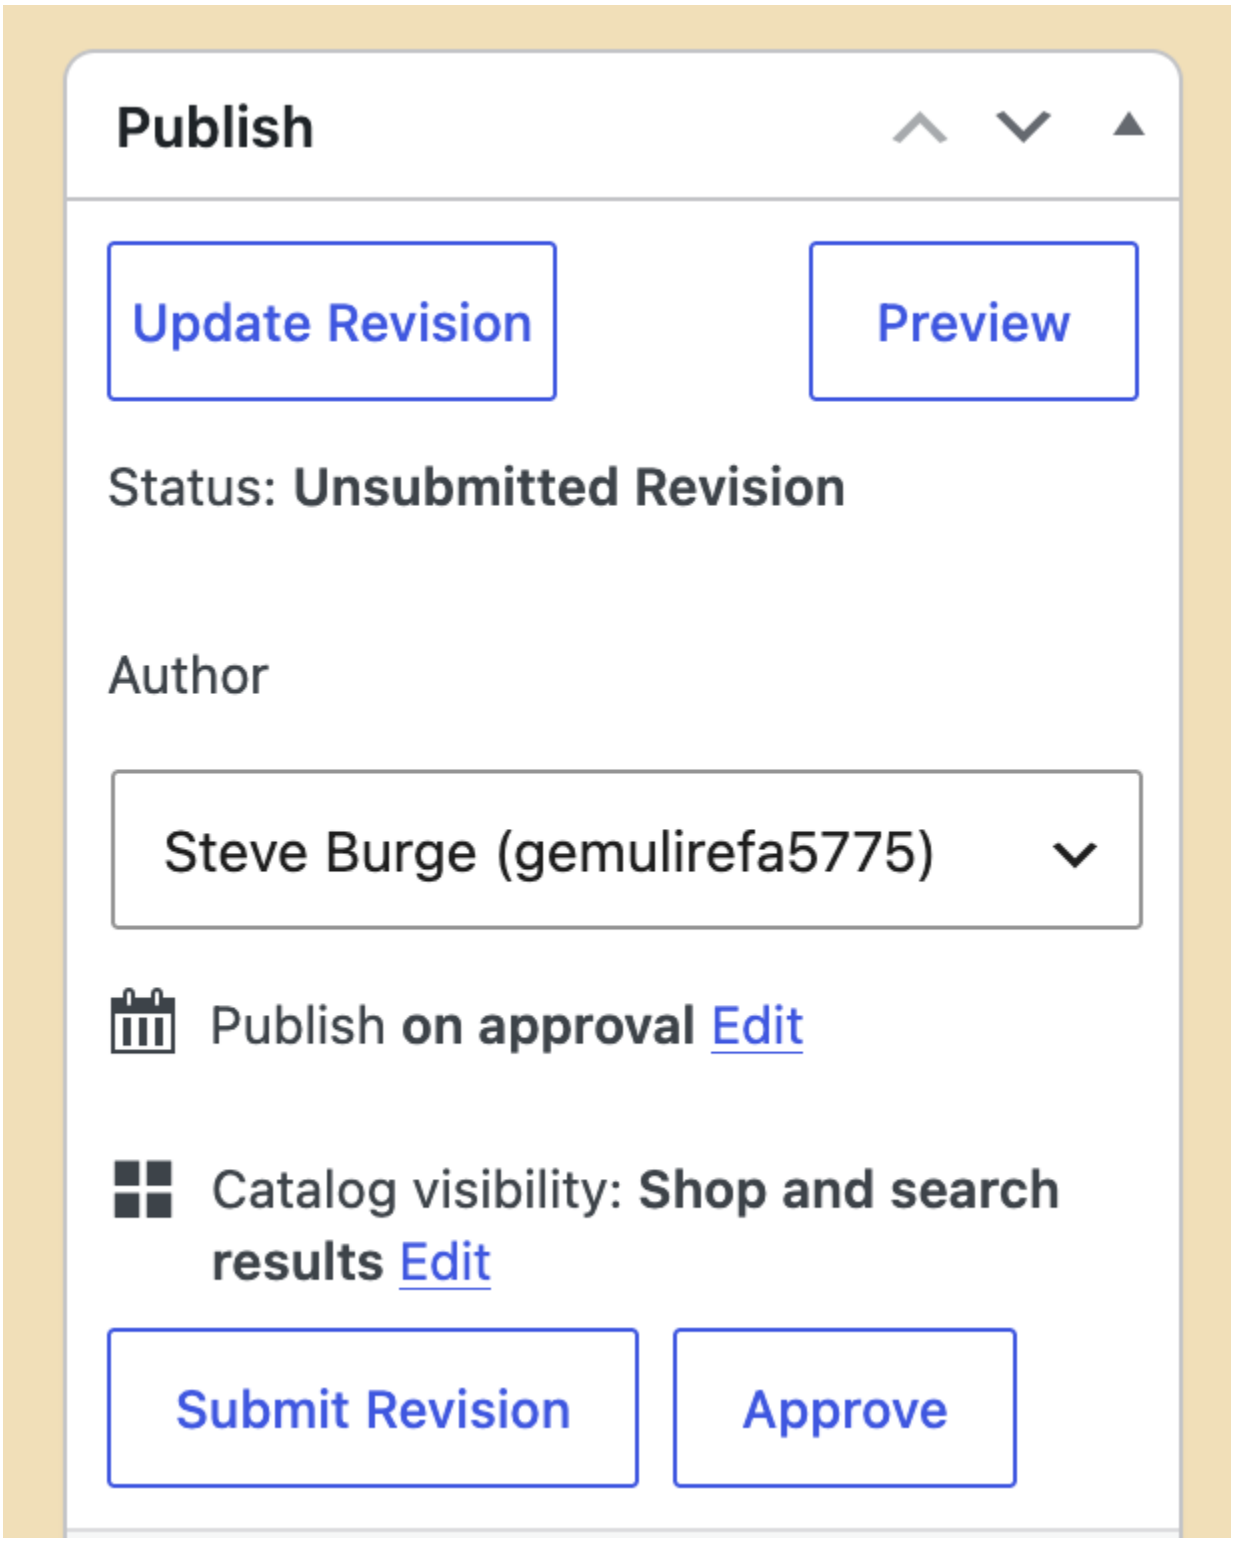
- When you are on the "Products" screen, click the "New Revision" link.



New Wc Revision

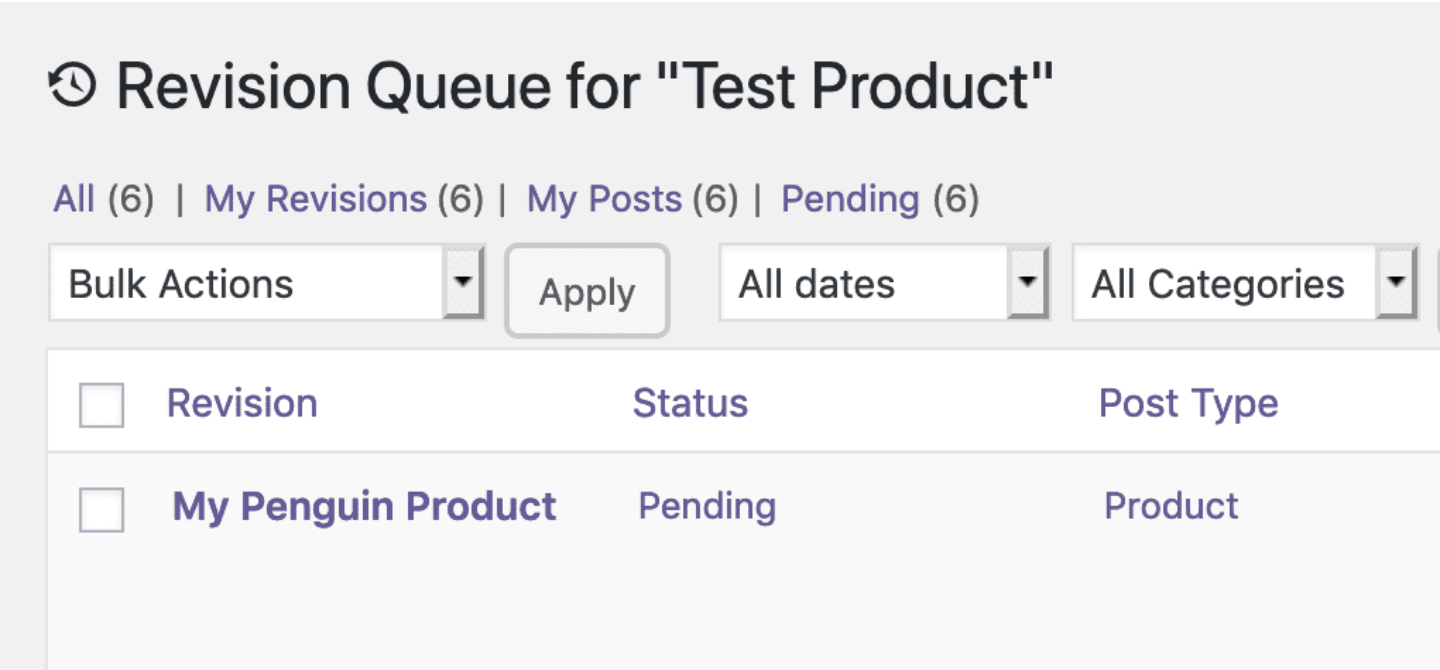
- Inside the product revision, the PublishPress buttons will appear in the top-right corner. These buttons are:
  - Update Revision
  - Preview
  - Submit Revision

- Compare

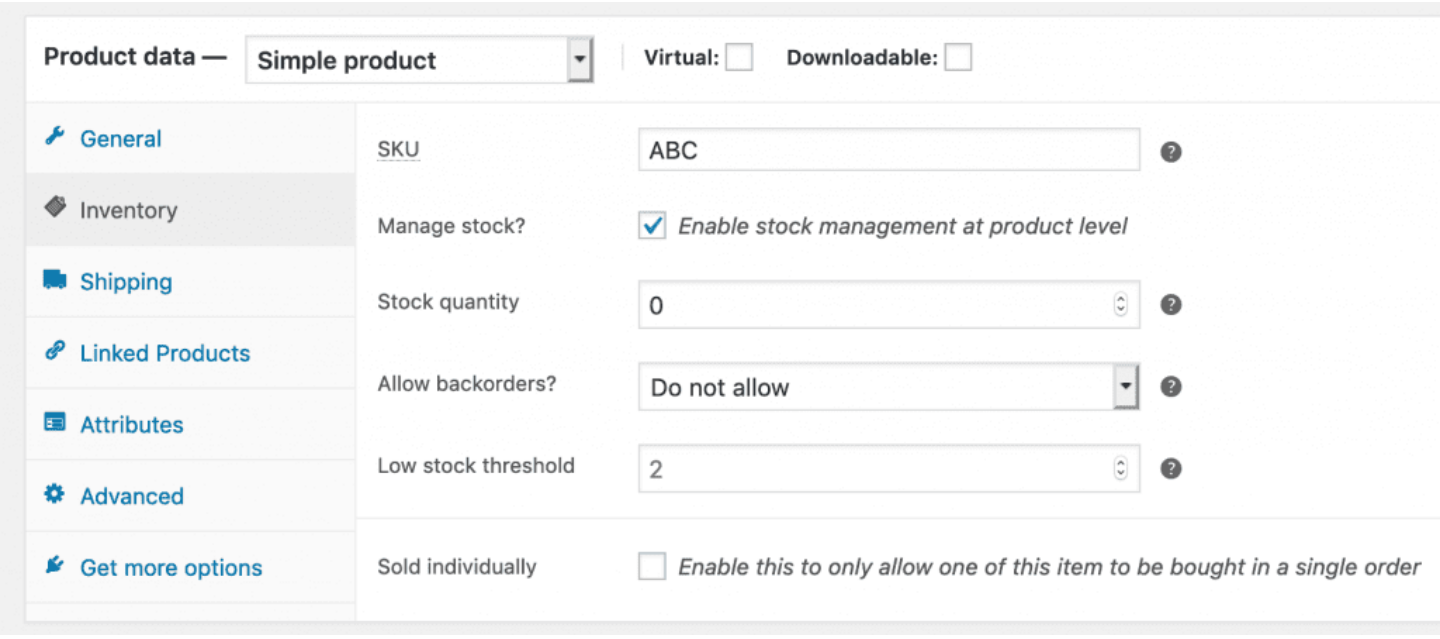


Revision Wc

- Before you publish the updated copy of the product, your product revision will appear on the main "Revision Queue" screen:



All key WooCommerce fields are supported by PublishPress Revisions Pro, including those in "Inventory", Shipping", "Linked Products", "Attributes", and "Advanced". This feature also support Product Variations.



If you are using 3rd party WooCommerce plugins, we do recommend testing their compatibility with WordPress revisions and PublishPress Revisions Pro.
