Templates for Author Category Boxes (Pro)

Author Categories · https://publishpress.com/knowledge-base/custom-template-for-author-category-boxes/

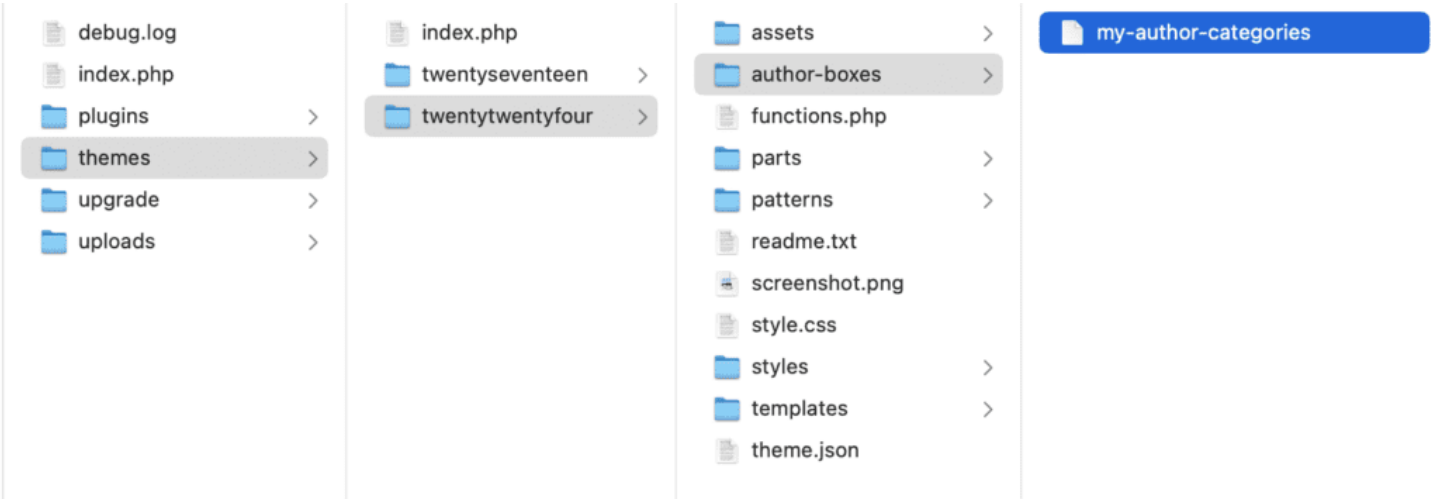

This feature requires the Pro version of the PublishPress Authors plugin.

In PublishPress Authors, you can customize your own Author Boxes by following this guide. That tutorial also works for Author Category Boxes. So in this post, we provide two samples of custom templates that you can apply for your Author Category Boxes.

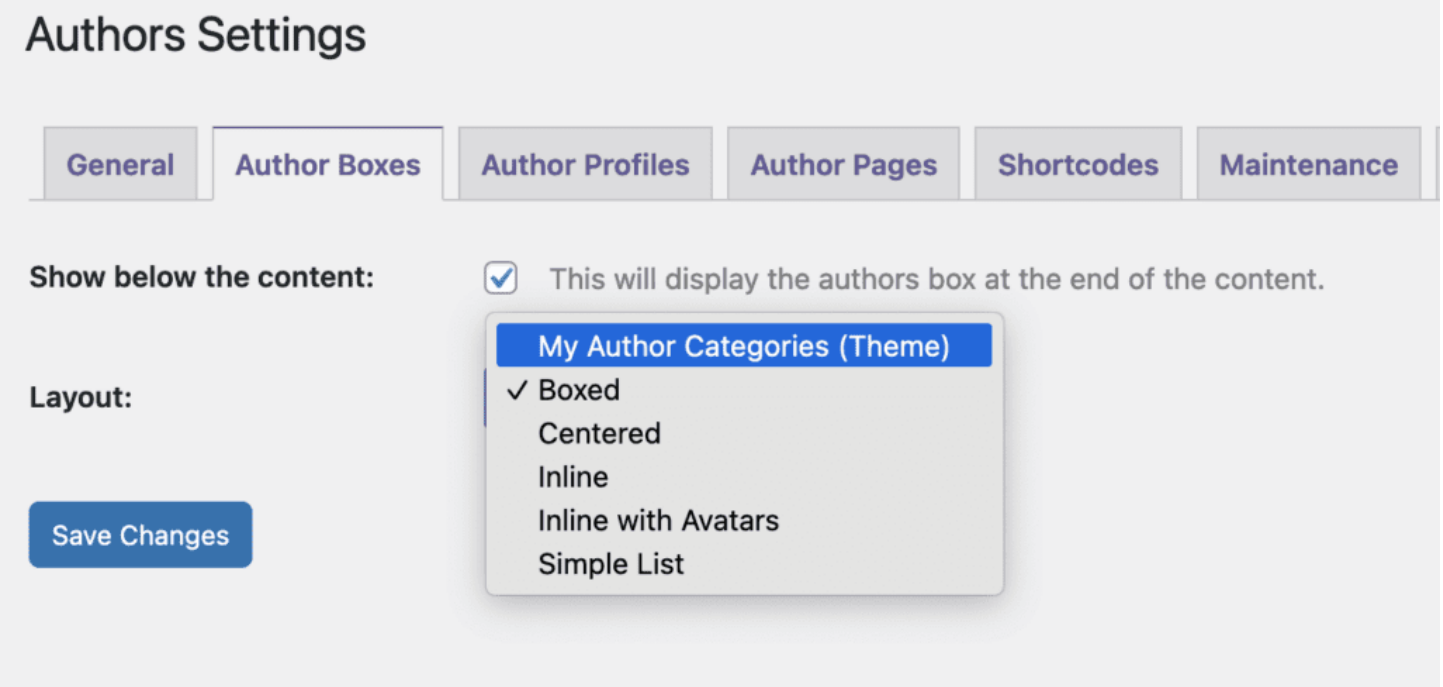

How to Use The Author Category Boxes

To apply these custom templates, please make sure to follow the steps in this documentation: Author Boxes and Custom Templates.

Downloaded the code from the Github Gist below and upload according to the custom theme documentation. The name we choose for the file in this screenshow below was `my-author-categories.php`.

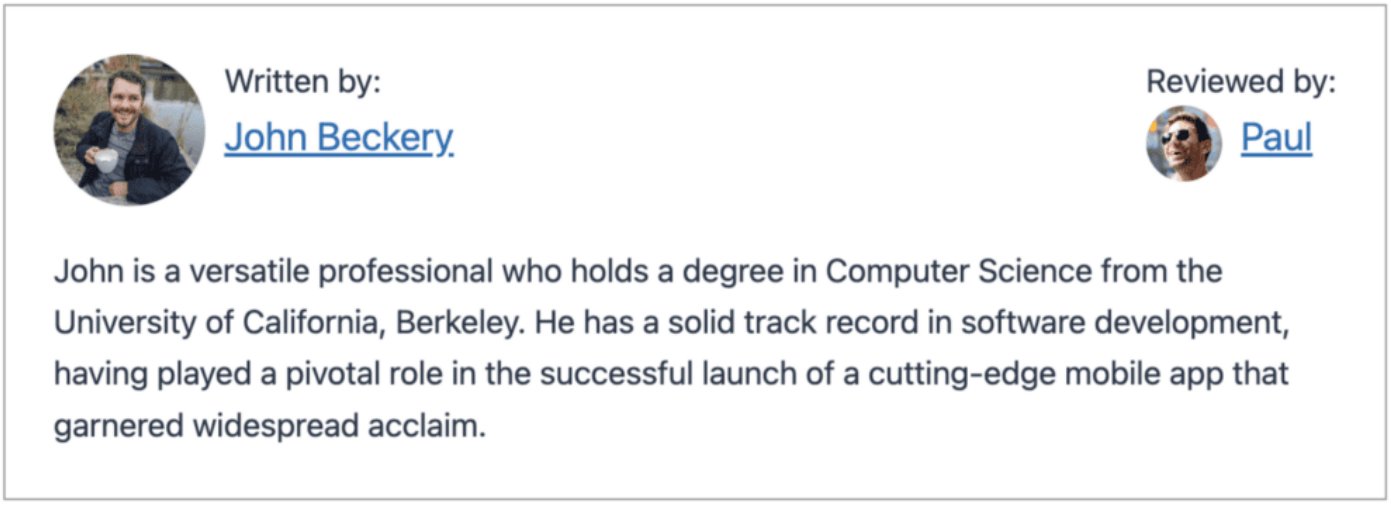

Once that file is uploaded, you can choose your template inside the PublishPress Authors Settings:

Custom Box #1

This screenshot below shows the design for this first Author Box. The code for this template is in the Github Gist under the screenshot.

Custom Box #1 (Code)

```
[gist id="d23fa10a37c0c063bd1bf50ea1214fc4"]
```

Custom Box #2

This screenshot below shows the design for this second Author Box. The code for this template is in the Github Gist under the screenshot.

Custom Box #2 (Code)
