Schedule Changes to Elementor Posts

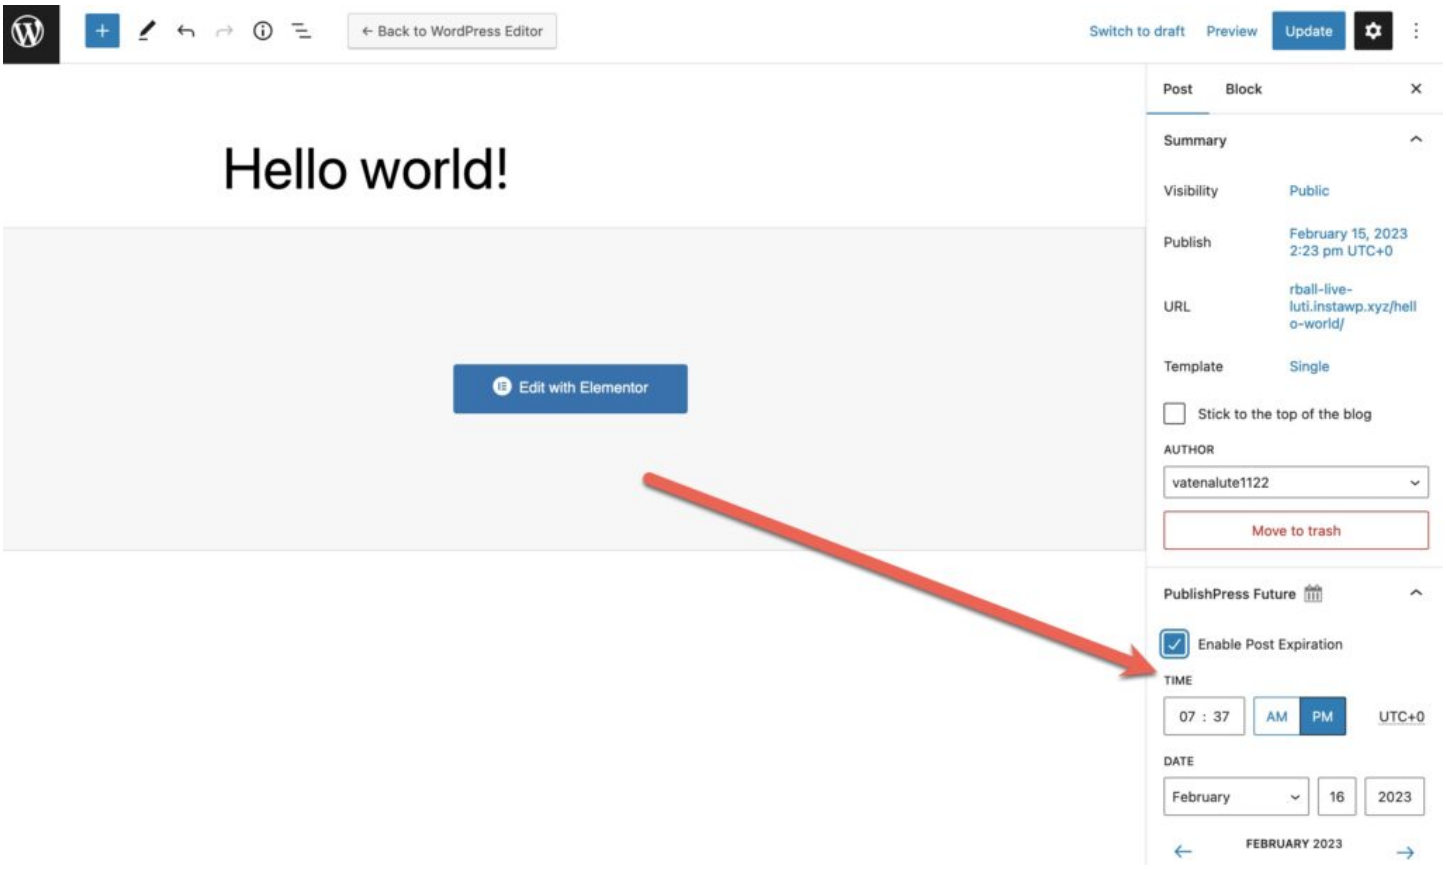
Future Actions and Other Plugins · https://publishpress.com/knowledge-base/schedule-change-elementor/

The PublishPress Future plugin allows you to schedule automatic changes to posts, pages and other content types using Elementor.

To enable this feature follow these steps:

- Go to Future > Post Types.
- Check the "Active" box for the post type you're using with Elementor.
- Click "Save Changes".

After you enable the PublishPress Future setting for Elementor content, you will see the "PublishPress Future" option in the right sidebar when editing your posts. You can see the "PublishPress Future" metabox in the screenshot below.



The "PublishPress Future" setting will also be available for the Quick Edit and Bulk Edit features for Elementor posts. You can see the "Quick Edit" option for PublishPress Future in the screenshot below:
