Multiple Ways To Show Author Field Values

Author Fields · https://publishpress.com/knowledge-base/show-author-fields-value/

In PublishPress Authors, there are multiple ways to show Author Fields values. There are 6 display options that you can choose to show Author Fields value:

- **Field Icon**: Outputs the icon that you choose in the Display Icon setting.
- **Field Value:** Outputs the value as a raw value.
- **Field Suffix:** Outputs the value from the Display Suffix setting.
- **Field Prefix:** Outputs the value from the Display Prefix settings.
- **Field Icon + Prefix + Value + Suffix:** Output the icon + prefix + value + suffix.
- **Field Prefix + Value + Suffix:** Output the prefix + value + suffix.

You can also combine it with HTML tag options. We provide 10 tags:

- span
- div
- link
- p
- H1
- H2
- H3
- H4
- H5
- H6

The 'span' will display as an inline element and the 'div' will display as a block element. To make this display a link, select 'link' and enter the first part of the URL into the “Value Prefix” field.

The following images are various examples of Author Fields in Author Boxes.

All icons

Icon + Prefix + Value + Suffix

Icon + Prefix (empty) + Value + Suffix

Prefix + Value + Suffix

Dylan Joe

Dylan Joe is a journalist with over 10 years of experience in the field. He has a degree in English and journalism from a local university, and he has worked as a reporter for a small-town newspaper. Dylan is known for his ability to find and tell compelling stories, and he has a passion for using his writing to inspire and inform. In his spare time, Dylan enjoys hiking and camping with his friends.
