How to Find the Latest Versions of PublishPress Plugins

Changelogs · https://publishpress.com/knowledge-base/versions/

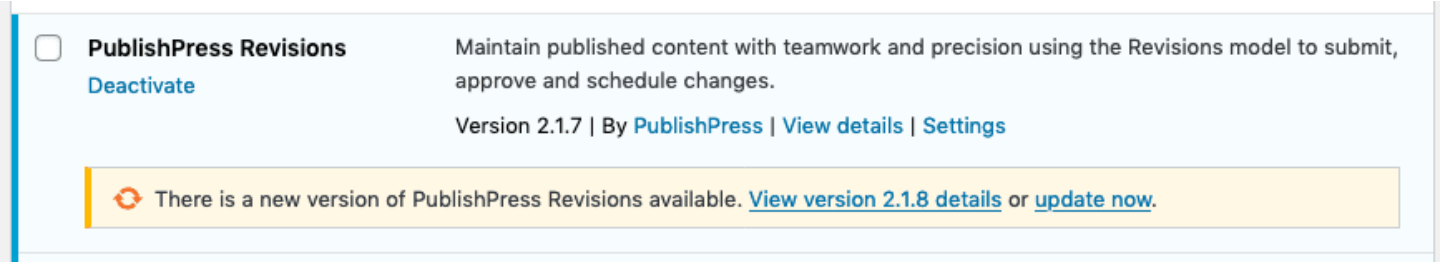
It's important to make sure you're running the latest version of WordPress and any PublishPress plugins you're using.

How do you know you're running the latest version of PublishPress plugins?

Find the latest version in the WordPress admin area

Your WordPress admin will show the latest versions of any plugins.

- Go to the "Plugins" area of your WordPress site.
- Any plugins that require an update will have a message with a yellow background, as in the image below:



Other ways to find the latest version

For the Pro version of PublishPress plugins, you can see the changelogs for each plugin.

For the Free version of our plugins, the WordPress.org pages will show the latest version.
