How to Choose a Custom Order in the Post Filter

Questions About Post Filters · https://publishpress.com/knowledge-base/how-can-i-display-the-posts-in-custom-order/

If you are using the Post Filter option in the Tag Groups plugin, it is possible to customize the order of the posts.

Install the plugin Simple Custom Post Order and use it sort your posts.

You will need to use the shortcode of the body (posts) part of the Toggle Post Filter which is [tag_groups_tpf_body].

If you are using a Gutenberg block, simply transform it to a shortcode.

Then make sure that the shortcode contains the parameters:

- orderby=menu_order
- order=asc

Here's an example of this shortcode:

```
[tag_groups_tpf_body orderby=menu_order order=asc]
```

Note: If you are using the *Masonry* post layout, the post order might change again because posts are arranged in the browser depending on each element's height.
