How to Install Tag Groups Free

Tag Groups: Getting Started · https://publishpress.com/knowledge-base/installation-2/

The installation of the free version of the Tag Groups plugin is straightforward. It can be installed using the same process as for other plugins on WordPress.org. Please follow these steps:

- Go to "Plugins" then "Add New".
- Search for "Tag Groups" and click "Install Now".

Alternatively, you can click on "Upload Plugin" and then upload the ZIP file. Or you upload the unzipped `tag-groups` folder to the `/wp-content/plugins/` directory. If you upload the unzipped files directly to your server, you may have to fix the file permissions for css and js files.

- Click on "Activate".

Tag Groups is the Advanced Way to Display Your Taxonomy Terms

Tag Groups allows you to organize your WordPress taxonomy terms and show them in clouds, tabs, accordions, tables, lists and much more.
