pp_get_group_by_name

Developer · https://publishpress.com/knowledge-base/pp-get-group-by-name/

```
/**
 * Retrieve a Permission Group object by providing its name

 * @param int group_name
 * @param string agent_type (pp_group, bp_group, etc.)
 * @return object Permission Group
 *  - ID
 *  - group_name
 *  - group_description
 *  - metagroup_type
 *  - metagroup_id
 */
function pp_get_group_by_name( $group_name, $agent_type = 'pp_group' )
```

Example usage

```
$group = pp_get_group_by_name( 'Cool Group' );
```

Notes

metagroup_type and metagroup_id do not apply to custom-defined groups.
