Tag Groups Info – Overview

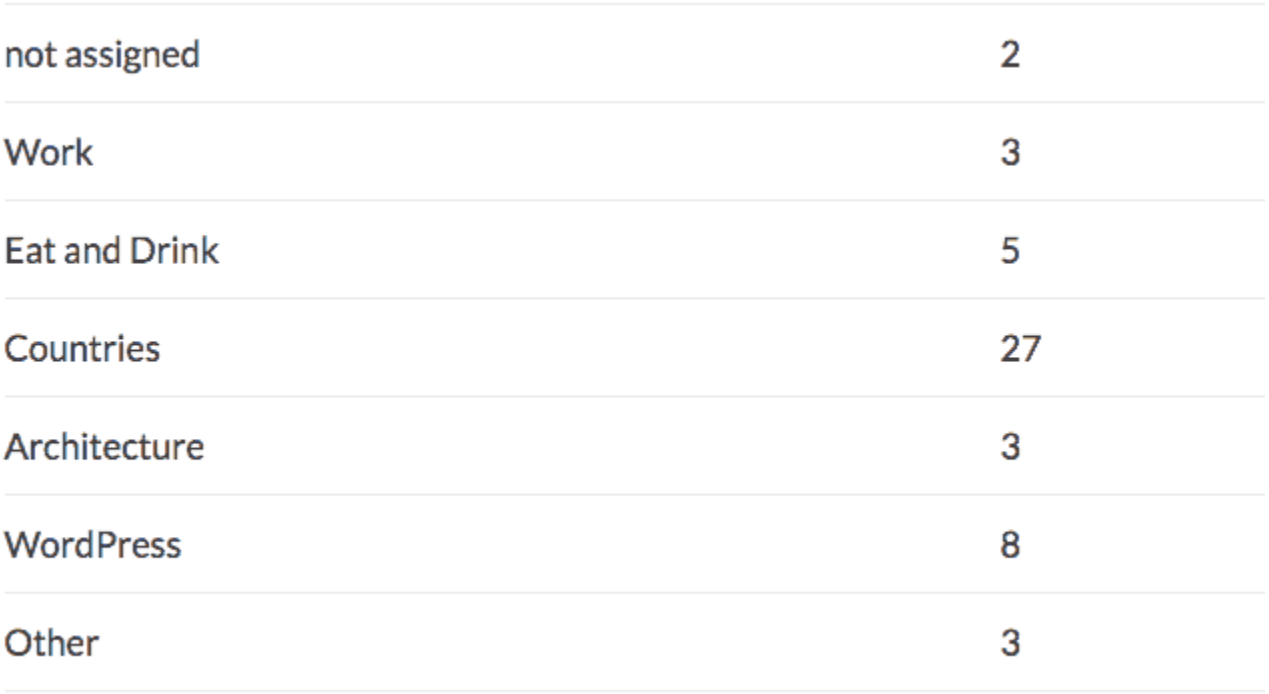

Tag Groups Info · https://publishpress.com/knowledge-base/tag-groups-info-overview/

The Tag Groups Info feature is part of the Tag Groups plugin and is available as a shortcode.

You can use a shortcode to display information about your tag groups. This usually comprises the group names and the post count (the number of posts that have tags in this group).

```
[tag_groups_info]
```

The output will look like this screenshot below:

not assigned	2
Work	3
Eat and Drink	5
Countries	27
Architecture	3
WordPress	8
Other	3

It is also possible to display only the name or the post count of one group. For more details see the list of parameters.
