# Post List – Overview

Post List (Pro) · https://publishpress.com/knowledge-base/the-post-list/

The Post List feature in the Tag Groups plugin allows you to show a list of posts with a specific term or in a particular tag group. The list is static and cannot be changed by visitors. There are optional links to the next or previous page.

Here's a screenshot of the Post List feature. This example shows posts with a featured image and the publish date.
