Toggle Post Filter, Reset Button – Shortcode Parameters

Toggle Post Filter (Pro) · https://publishpress.com/knowledge-base/toggle-post-filter-reset-button-shortcode-parameters/

This button resets the menu of the Toggle Post Filter.

Note: This shortcode is also available as Gutenberg block. You can configure the block without using any code or parameters.

Shortcode

```
[tag_groups_tpf_reset]
```

Example

```
[tag_groups_tpf_reset theme="light"]
```

Data Types

- **string:** A text. For identifiers that won't be visible to visitors you often have to replace spaces with _ or -. If the string contains spaces, you need to wrap it in quotes.
- **integer:** A number without decimal places.
- **0 or 1**: 0 turns the feature off and 1 on.

Parameters

This overview assumes that you know how to use shortcodes. Shortcodes are the traditional WordPress way how to add features into posts, pages and widgets.

button_text

Text for the button

Default	Possible Values	Example
"Reset filter"	string	`button_text="Show all"`

theme

Select a theme. Currently we have "dark" and "light".

Default	Possible Values	Example
"light"	string	`theme="dark"`

button_class

Optional CSS identifier for the button.

Default	Possible Values	Example
empty	string	`button_class="my-button"`
