WooCommerce product tasks (Pro)

Checklist Plugin Integrations · https://publishpress.com/knowledge-base/woocommerce-product-tasks/

This feature requires the Pro version of the PublishPress Checklists plugin.

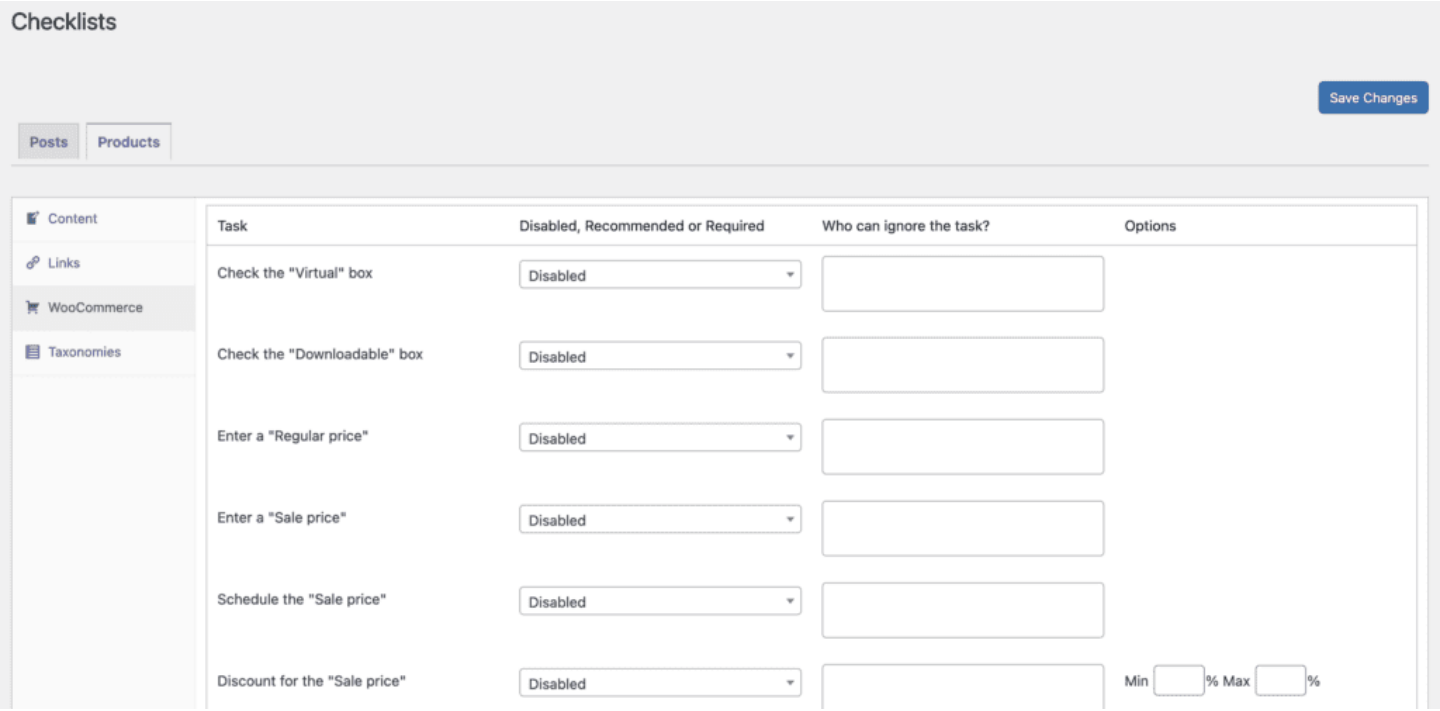

One of the features in the Pro version of PublishPress Checklists is support for WooCommerce products.

If these requirements are not met, you can choose to show a warning, or prevent the product from being published.

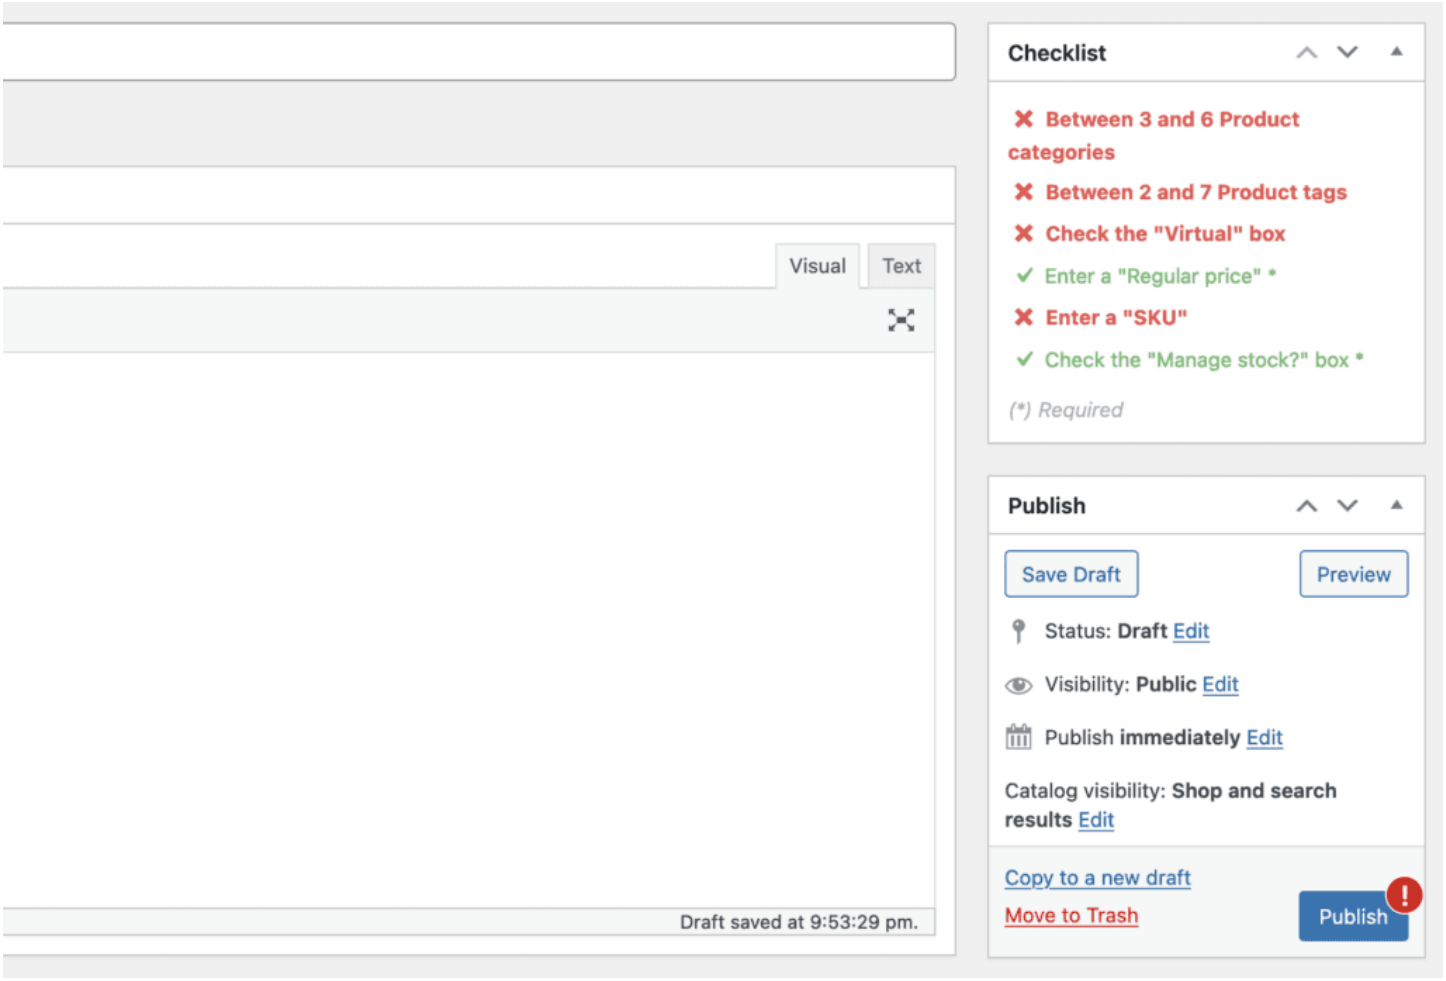

Here is a list of all the tasks available for WooCommerce products:

- Check the “Virtual” box
- Check the “Downloadable” box
- Enter a “Regular price”
- Enter a “Sale price”
- Schedule the “Sale price”
- Discount for the “Sale price”
- Enter a “SKU”
- Check the “Manage stock?” box
- Check the “Sold individually” box
- Check the “Allow backorders?” box
- Select some products for “Upsells”
- Select some products for “Cross-sells”
- Product image

You can find these in the Pro version of Checklists by going to the "Checklists" screen, clicking the "Products" tab, and choosing "WooCommerce" in the left sidebar.

When you create products in WooCommerce, you'll see the checklist tasks in the right sidebar, as in this screenshot below:
